

Agreeing isn't testing.

Sessions are invalidated change ✓
Login, reset and OTP are rate-
limited per IP and per account ✓
Every record lookup checks ✓
ownership, not just authentication ✓
Audit log records actor, IP and
change; can't be self-deleted ✓
Every tool call re-checks the
user's permissions server-side ✓

INSPECTION TAG

TEST: two browsers,
change password in
one, refresh the other

EXPECT: 401

RESULT: 401

RUN ON: SEPT 18 2026

*Sessions are invalidated
on password change ✓*

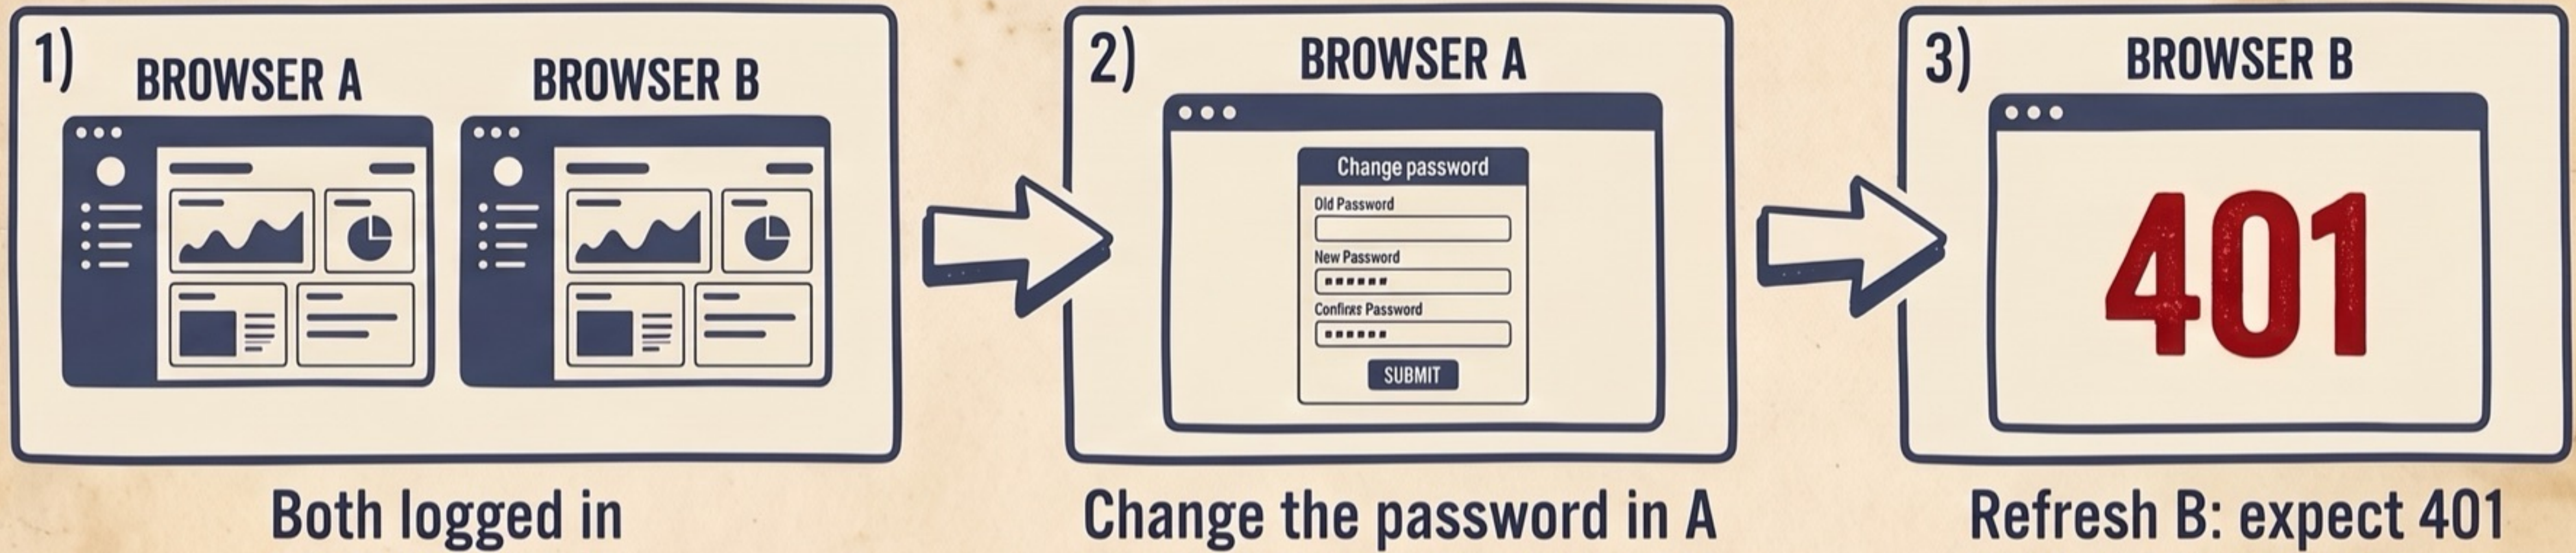

**Same control.
One of them can fail.**

TEST: log in on two browsers, change the
password in one, refresh the other
